Wasiq Mudasar

Full-Stack Developer (Werkstudent) · AI / LLM Pipelines · Spring Boot · React / Next.js
Ilmenau, Germany | +49 152 1388 5503 | wasiq119@gmail.com | linkedin.com/in/wasiq-mudasar | github.com/wasiq119

PROFILE

Shipped a **live production AI platform** (ai-jobassistant.me) achieving 94% skill-match accuracy via a deterministic Jaccard Similarity engine — replacing hallucination-prone LLM scoring with a mathematically reproducible metric. Specialises in **Spring Boot 3.5 + LLM pipelines**, GDPR-aligned local LLM deployment (€0 cloud API cost), and React / Next.js frontends. Available as **Werkstudent up to 20 h/week** (TU Ilmenau, German student visa compliant), working in Agile/Scrum cycles.

TECHNICAL SKILLS

AI / ML: Spring AI 1.1.4, Groq, OpenAI API, Gemini API, RAG Pipelines, pgvector, ChromaDB, Jaccard Similarity, Prompt Engineering, LLM Orchestration, Multi-Agent Orchestration

Local LLM: Qwen-2.5-Coder, Llama-3 (local GPU), Ollama, Gemini CLI, Air-Gapped Deployment, GDPR-Aligned Pipelines

Frontend: React 18/19, Next.js 16 (App Router), TypeScript, Three.js, React Three Fiber, Framer Motion, GSAP, Tailwind CSS 4, Angular, Vite

Backend / JVM: Java 17, Spring Boot 3.5, Spring Security 6, Node.js, Express.js, Python, RESTful APIs, JWT, Apache PDFBox, Apache POI, NextAuth v5, Zod

Databases: PostgreSQL, pgvector, ChromaDB, MySQL, SQLite, Hibernate/JPA, Liquibase, Flyway, Prisma ORM, Neon (Serverless PostgreSQL)

DevOps: Docker (multi-stage), GitHub Actions, Vercel, Git, Postman, Linux

Languages: English C1 · German B1 · Urdu (Native)

PROJECTS

AI Job Application Assistant — March 2026 – Present

Production Full-Stack AI Platform · ai-jobassistant.me

- Engineered a deterministic Jaccard Similarity scoring engine in Java — normalising skill aliases, stripping version numbers, computing |Candidate∩Required| / |Required| × 100 — delivering 94% match accuracy with zero AI hallucination
- Built zero-hallucination URL routing: Java holds Adzuna DE job entries in memory, strips URLs before LLM ranking and re-injects original redirect_url by index — guaranteeing 100% link integrity across live German job results
- Deployed Qwen-2.5-Coder and Llama-3 via local GPU inference; RAG pipeline (pgvector / ChromaDB) reduced hallucination rate by 40%, cutting cloud API cost to €0 with full GDPR-compliant data residency
- Automated CI/CD via GitHub Actions + multi-stage Docker; Liquibase/Flyway enforced 100% schema consistency with zero-downtime migrations across local and production PostgreSQL

Stack: Spring Boot 3.5 · Spring AI 1.1.4 · Groq / Llama-3 · React 18 · TypeScript · PostgreSQL · pgvector · Docker · GitHub Actions

AI-Native Software House — Oct 2026 – Present

Multi-Agent AI Web Development Platform · Full-Stack

- Replaced single-prompt AI website generation with a 7-agent pipeline (Manager, Designer, Frontend, Backend, Animation, QA, Debugger) using dependency-locked tasks and structured handoff notes — Frontend reused 5/5 Designer colour decisions, keeping design consistent across agents
- Built a spec-to-code compiler converting agent JSON specs into validated Next.js pages and Zod-validated API routes across 16 reusable section types; 8 automated checks (imports, JSX, accessibility) + AI review + Debugger auto-fix — generated home page passed QA on first attempt
- Engineered free-tier-aware LLM routing across Groq model tiers with per-minute/daily quota tracking, retry-after handling and local Ollama fallback — 19-file, 6-section benchmark in 14 s of LLM time with 0 rate-limit errors; full plan-to-QA run at 13,751 tokens (€0 API cost)
- Delivered a multi-tenant platform (24 Prisma models, NextAuth v5) with lead capture, Kanban, a sandboxed live preview executing API routes in-browser and in-place client editing; closed 7 tenancy/auth gaps including cross-organisation data leakage

Stack: Next.js 16 · React 19 · TypeScript · Tailwind CSS 4 · Prisma · Neon PostgreSQL · NextAuth v5 · Zod · Groq · Ollama

StellenPortal Deutschland Sep 2026 – Present

German Job Portal — Full-Stack

- Architected 20+ route Next.js 16 App Router portal covering candidate + employer dashboards, salary calculator, and GDPR-compliant legal pages (Datenschutz, Impressum, AGB) — built to German market compliance standards
- Performance-optimised Three.js / React Three Fiber 3D hero: demand frame loop, particle count −62%, SSR-safe lazy load — targeting sub-100ms interaction on mid-range devices

Stack: Next.js 16 · React 19 · TypeScript · Three.js · React Three Fiber · GSAP · Framer Motion · Tailwind CSS 4

Neuro Tracker 2022

Healthcare Diagnostic App — B.Sc. Capstone

- Offline-first Android app for Guillain-Barré Syndrome early detection — 91% diagnostic consistency vs. standardized triage charts; 0% network dependency via SQLite for clinical environments

Stack: Java · Android SDK · SQLite

WORK EXPERIENCE

Java Developer Intern (Full-Stack) Feb 2023 – Sep 2023

Inseyab Consulting & Info Solutions · Pakistan (Remote)

- Integrated TypeScript / Angular Material frontends with Spring Boot REST APIs, reducing manual data-handling steps by 35% via endpoint consolidation across 3 core service modules
- Refactored legacy monolithic codebase, cutting end-user runtime error rate by 45% and improving application stability by 30% within live Agile/Scrum sprint cycles

Mobile Application Developer (Internship) Jun 2022 – Sep 2022

The Techvein (Pvt.) Ltd. · Pakistan

- Delivered all mobile modules 15% ahead of sprint deadlines; received 5/5 across Work Quality and Technical Job Knowledge on formal performance evaluation

EDUCATION

M.Sc. Media Engineering Apr 2024 – Present

Technische Universität Ilmenau, Germany · Werkstudent eligible: up to 20 h/week

B.Sc. Computer Science Jan 2018 – Aug 2022

IQRA University, Karachi, Pakistan

Sep 2023 – Apr 2024: German student visa processing and international relocation from Pakistan to Germany
